

# your "pet" computer

The Rabbit RX83 can handle a lot of video games which are educational and can improve your reaction time.

With The Music Composer software, you can enjoy the fun of composing or playing back your own music with two harmonies. Don't bury your music talent.

The lovely Rabbit Computer is fast becoming the popular personal "pet" computer of many people who want to enter the exciting world of computer age. (Nobody wants to be computer illiterate)

The easy-going Rabbit RX83 helps you become the master of the computer while many other hard-to-use computers often result in wasting of time and money. Manufactured with state-of-the-art computer technology, the Rabbit Computer is the ideal "pet" for you.

You can communicate with the Rabbit Computer in BASIC language — the simpliest and easiest-to-use program language. Your Rabbit RX83 comes with a progressive, easy-to-understand manual with which even a school kid can be computing in minutes. And it "grows" with you. When you become more experienced with the computer or if you dersire, you can expand the capabilities of the Rabbit RX83 and build up a more sophisticated system with a range of low-priced accessories such as joysticks, printers and cassette recorders.

There are lots of things you can do with your Rabbit Computer System. To name a few:—

- 1. To write programs in BASIC language.
- 2. To play color video games with arcade sound effects.

## at affordable low price.

You can write programs in BASIC language to do mathematics or house-keeping records.

You can write your own game programs later on when you become more proficient in computer software.

- 3. To compose your own music and play it back. Great idea!
- 4. To set up a home budget and keep track of expenses.
- 5. To construct color graphs and pictures.
- 6. To do mathematics or other educational exercises with fun.
- 7. To solve jig-saw puzzles.
- 8. To control a robot. (Sounds incredible, but it's true)

#### Main Features of the Rabbit RX83.
