Mfd in USA

Dear Michael

Your most interesting letter just arrived ~~just after Christmas~~ & I thought I'd best get back right away. Frankly because there is no point in sending anything to Dr Gladden. He's not involved with A production any longer.

We'll certainly keep the A going for 2 more issues (I trust you rec'd the Dec issue by now). Whether to go on after issues 3+4 depends on reader response and material to print. It does seem like we have a somewhat dedicated kernel of A. enthusiasts

Baldwin II? Will that's a big surprise! Is Dick Belton aware of your efforts? I'm sure he would find it very interesting

And a high-res machine too! Motherboard charges are ~~~~ acceptable - I recall John's board had lots of piggyback memory attached - I'll try to get in touch with him [I think he is still with?] We have some motherboards here + some spare chips as well. Actually, the units themselves are getting so cheap that one can get 2 that one can build up the extra parts relatively cheaply.
