DEAR BOB:

I STARTED RECEIVING your newsletter in February, 1983 and I've enjoyed it VERY much. I purchased all back issues and it was worth the money. I must congratulate you and the other early owners of the Bally computer for learning how the machine works and then providing documentation in the newsletter for others to experiment with. I'm looking forward to more machine-language programs that utilize machine graphics in the BASIC program or machine-language programs that are 100% machine language.

The reason I'm writing is to show with you the attached drawings of what I think the ~~castle~~ castle in the "Crown of Zeus" (Volume 5:1:7) by Todd Johnson looks like. I would like to know if anyone has written this program to produce graphics on the screen of the movement from row-to-row. I think this would be a great program to see with graphic displays. Perhaps, some of those great programmers ~~in~~ ~~you~~ that write in the Arcadian can publish ~~some~~ <sup>game</sup> graphics for this program.

By the way, are there people working to modify programs ~~to~~ like "Fudd" and "Stranded on Angel 5" so that owners of the Astro BASIC EXTENDED (2000 Band built-in interface) can run them. I don't understand the machine memory locations to modify these programs. I own the new Astro BASIC not the old Bally BASIC.

Once again, I enjoy your newsletter and  
look forward to each addition. If you get a  
chance, please reply.

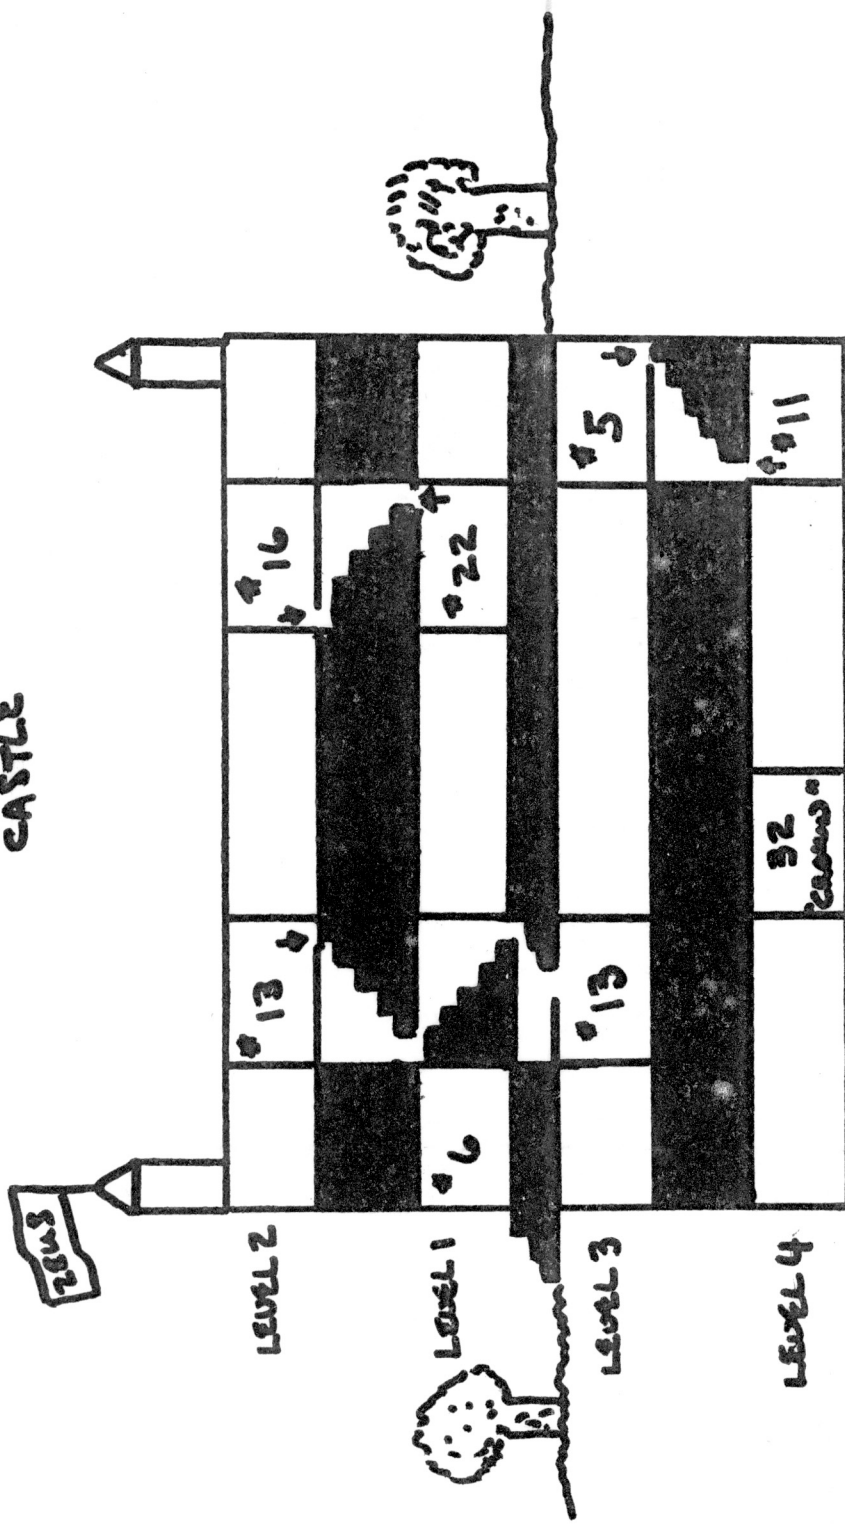

Sincerely,  
Edward Mahoney

P.S. What is wrong with the "Black Jack"  
program Vol. 5:6?
