

BOX 94801
SCHAUMBURG, IL 60193

-  clanky 10 POINTS
-  claws 20 POINTS
-  rabbot 30 POINTS
-  flatop 40 POINTS
-  bonzo 50 POINTS

This program will not work unless these instructions are followed.

Key in:INPUT;RUN then start the recorder, now press go. The game starts by showing you five levels and point values of each.

You will find yourself in a room surrounded by monsters who's only mission is to kill and destroy. You are the target. You have been armed with a skill to build walls very quickly. This is done by moving the joystick in the direction that you want to build the wall and holding the trigger till a building block forms, then reversing direction so you don't run into it. If a monster, hits a wall or another monster he dies and you receive points. Each level becomes more difficult. Higher level monsters can turn walls into doors; if you throw a block ontop of a monster it is turned into a shield which he can pass through but you cannot. There is a escape door through the bottom that you can use when all is lost, provided it's open. Bonus man is awarded after completing all five levels. Intensity increases as score gets higher.

- CLANKY-10 POINTS-leaves blocks intact, can be stepped on if not moving,
- CLAWS -20 POINTS-makes doors, cannot be stepped on, you can move through his shield
- RABBOT-30 POINTS-makes doors, more aggressive, can be stepped on.
- FLATOP-40 POINTS makes doors, more aggressive, can be stepped on.
- BONZO -50 POINTS makes doors, cannot be stepped on
- *A DOOR CANNOT BE CHANGED BACK TO A BLOCK
