ARCADE

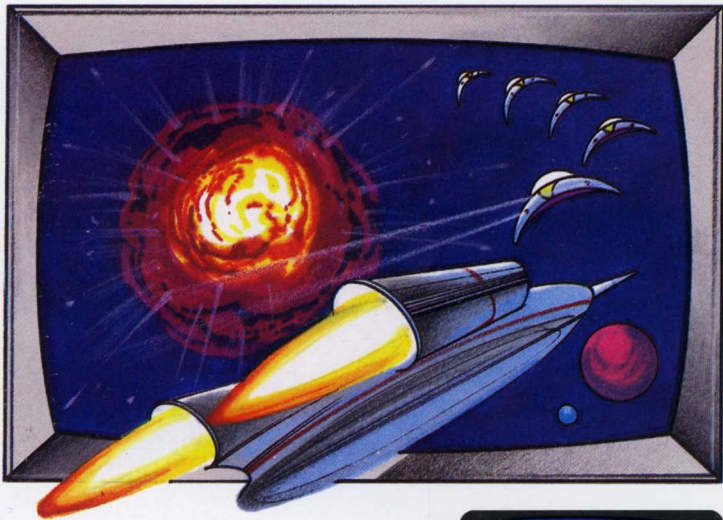

by ASTROVISION

# Galactic Invasion -2011

Defend the planet against the alien invasion.

You must aim your missile launcher at the enemy ships which are in the shape of giant mechanical insects. The alien ships descend singularly, in pairs or in groups of three. Each of

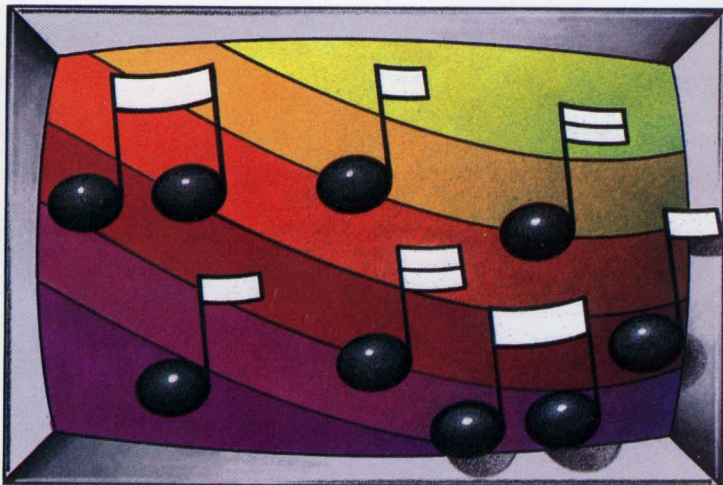

the ships are piloted by highly skilled captains who are capable of maneuvering their crafts with incredible agility. They can confuse you as they peel off from formation, and just as you finally destroy the last ship, you are besieged by another wave of invaders.

# Music Maker I - 4003

With Music Maker I it's fun and easy to create your own electronic music. The Arcade's 3-octave music system provides realistic organ sounds through your TV speaker. You can create three note chords and set the tempo of the music as

fast as you like. All functions are performed with a single hand controller for convenience and remote operation. An evening of fun for the entire family.

# Space Fortress - 2012

RED ALERT!!

Alien ships  
approaching!

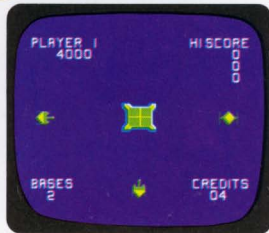

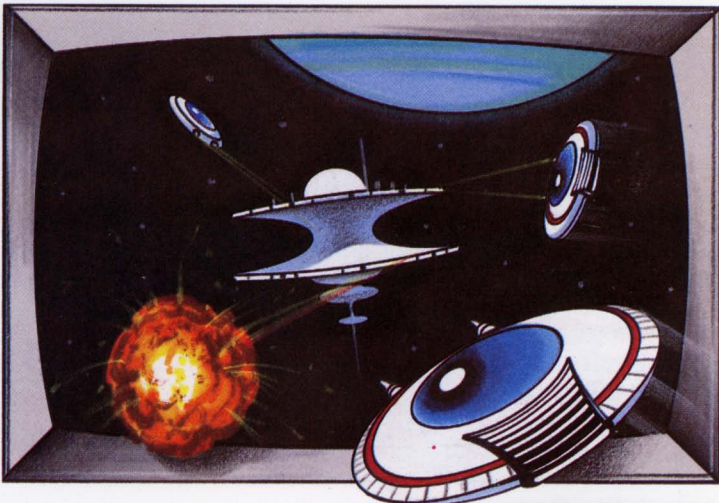

You are the  
commander of the  
space station

ASTRAI and  
your duty is  
to defend  
against

attacking alien  
vessels. Space

Fortress  
always keeps  
your interest  
because of the  
increasing

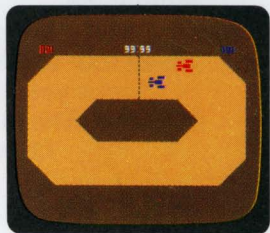

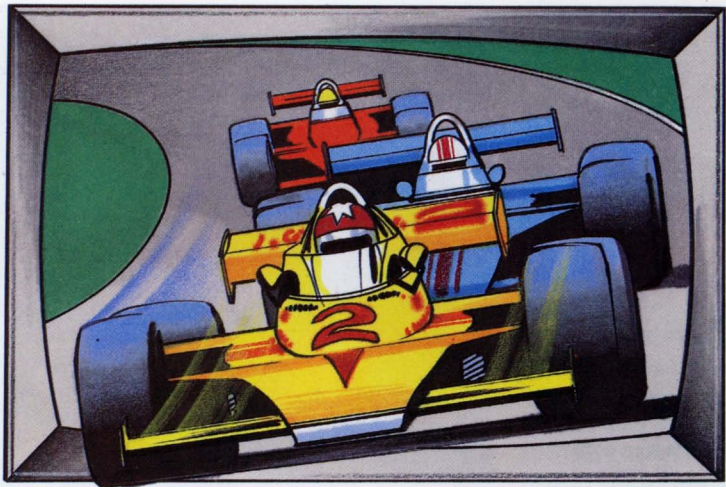

speed of the enemies assault. You are attacked  
on all four sides of your station and you must  
focus your laser cannons and destroy the  
invaders. The quicker they are eliminated, the  
faster they are replaced by others.

# Grand Prix Demolition Derby - 2014

Jockey for position at Le Mans or drive your roadster through a figure eight crash course. You get all the excitement of formula style racing. These two games require the ability to sacrifice speed for maneuverability. One

to four players can participate in the action. With Grand Prix and Demolition Derby you can start at an easy level and as your ability increases, you can choose to compete at higher levels of difficulty.

# Biorhythm - 4004

This cartridge can help you develop a new level of awareness about your moods and personal interaction with the world around you. Enter your birth date and watch the computer calculate your physical, emotional and

intellectual cycles. The color graph on your TV screen will clearly show your highs, lows and critical days. Great fun for parties and family gatherings. Check out your friends and become the neighborhood guru.
