SFP Video Expansion

The Bally Professional Arcade has been developed by the leader in commercial arcade games. It is now available to you from SFP by ASTROVISION.

The ARCADE gives you the only video game with 8-way hand controls. Joystick, knob and trigger allow software designers, like yourself, to create interactive games with more kinds of motion. A complete color spectrum is available with 256 possible combinations in picking each of the two colors on the screen. The ARCADE contains three computer processors operating in parallel for faster motion, better sound, and highest realism on the screen. A three-channel music synthesizer and sound effects generator creates tunes and realistic gunshots.

There's no easier way to learn about computers than with the new Bally Basic system. Just plug in the Bally Basic cartridge with built-in audio tape interface and convert your ARCADE into a personal computer you can program yourself. This version of BASIC is ideal for learning about computers. You can easily program colors, shapes, music and sound effects.

Simple words like LINE and BOX make drawing on the screen easy and direct.

Add the ZGrass Keyboard expansion, and your ARCADE becomes the most powerful personal computer available today. The ZGrass Keyboard plugs into the ARCADE to give a full typewriter keyboard and number pad. You also get additional memory. With 16K RAM, it gives you more space for creating and storing longer programs. Also, an additional 32K ROM contains powerful system software that make this the easiest computer to use.

The 32K ROM features the ZGrass Computer language and a complete scientific mathematics package. The full math package includes; sine, cosine, tangent, arctan, arccos, arcsin, power, natural and base ten logarithms, and square root.

The Bally Arcade Plus and Z Grass -32 Computer Keyboard system, together, will be just the beginning of new learning and entertainment fun.
