Dick,

Here are some cartridges on tape plus Graphix Tablet in extended BASIC.

To load cartridges use Astro Basic and set your Viper Switches to "24-K" and Non Protected mode. Load from tape with :INPUT %(24576) GO. Wait for cursor, (about 40 sec). Then throw the protect switch to the PROTECT mode and the range switch to "8-K". RESET should bring up the menu.

TO MAKE A COPY:

Throw the range switch back to "24K" and use :PRINT %(24576),4096 GO while recording.

Note: you could also make me a copy of your Viper ext. BASIC this way at 2000 Baud. Just load it with the Old Bally Basic at 300 Baud, swap cartridges, and follow the above directions!
hit RESET

George
