# THE DATAMAX UV-1R

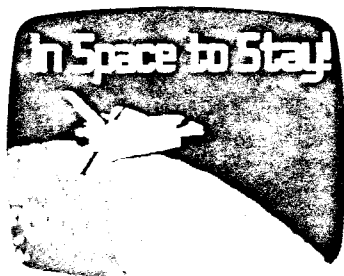

---

## Zgrass GRAPHICS SYSTEM

---

For Affordable, Easy-to-use  
Computer Graphics and Real-Time Animation

---

Now you can create animated computer graphics for your video productions at an affordable cost. And do it without the services of an expensive computer programmer.

---

### EASY TO USE?

---

With the UV-1R Zgrass Graphics System, the artist can draw an image on an electronic canvas and watch it develop on the screen in real time. User-oriented menus give continuous, detailed instructions.

You can produce real-time animation sequences in under 10 minutes and record them directly to video tape. The images that you see here were created by graphic artists using a software package that requires no computer programming knowledge.

---

### AFFORDABLE?

---

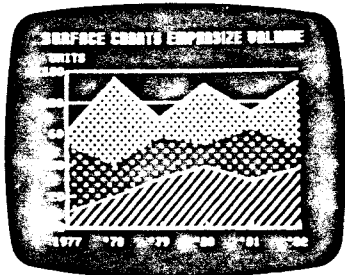

The DATAMAX UV-1R Zgrass Graphics System basic configuration costs about \$12,000 complete.

---

DATAMAX features and options\* include:

---

- Zgrass—the computer language designed for artists
- a palette of 256 colors, four displayable per area
- user-friendly software packages
- NTSC composite output (RS170)
- Gen Lock\*
- a video digitizer\* to scan any video image into the system for computer manipulation.
