

Come design your own simulated African tapestries, Arabesque mosaics, and Indian Weavings on a Z&RASS computer! We have put together an interactive graphics installation at the Museum of Contemporary Art, 237 E. Ontario in Chicago. It's called "FROM VIDEO GAMES TO VIDEO ART," and it runs until 10/12/80, after which we will have tapes on exhibit until 11/23/80, all part of a group show "VIDEO ART: THE ELECTRONIC MEDIUM," curated by Cindy Neul of the Chicago Editing Center.
