Dear Mr. Fabris:

As a regular reader of the Arcadian, I would like to submit two of my own developed programs. The first one called (not originally) "Pac*Man" I wish to submit as regular program and the second, "Control 30" I would like to enter in your monthly contest. (If it still exists. If it doesn't you can include it if you wish as a "regular program."). Listings and a tape of both programs are enclosed. They are for use in AstroBasic only but I suppose that with a few alterations they could be made to run in Bally Basic.

Also would you put me on the list for people who are interested in ZGrass units?

Finally would you please run the following small ad in the rear of the Arcadian:

" Willing to trade extra AstroBasic in excellent condition for Bally Basic w/ Interface or for any of the following Videocades: Pirate's Chase, Solar Conquerer, or Cosmic Raiders. D. Low 3020 Cook St. Victoria, B.C. V8T-3S9 Canada (604) 3866918 "

Thank You
Dale Low
Dale Low

Thanks!
