

Missile Defense

Save your city! You use your joystick to place three block-barriers in front of the on-coming missile. When you find the spot you want, pull the trigger, and go get another block. The faster you get all three barriers into place, and stop the missile, the higher your points are. If you stop the missile and only get one or two barriers out, its automatically a mere 100 points. You have to be fast! If a missile heads off your screen, you're safe, it goes on over to another town, maybe another state! After you've gotten 1000 points, the missiles come faster, and after 2000 points, they get faster yet. However, you get a small break, because then your barriers get wider. You'd better be careful, because if a missile hits, your city gets eaten up by radioactive material. If you're lucky enough to get the high score of the day, though, you get a fantastic bonus - you can put your initials in. To do so, when the screen says you have high score, wait for a letter to appear. As soon as it does, turn the knob until it gets to the letter you want, and then pull the trigger. In a matter of seconds, another letter will appear, and you do the same. You'll get 3 initials.

Have lots of fun!!!
